Version: 9.0

Question: 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You use `dplyrXdf`, and you discover that after you exit the session, the output files that were created were deleted.

You need to prevent the files from being deleted.

Solution: You use `rxSetComputeContext` with the `local` parameter before performing operations that save results.

Does this meet the goal?

A. Yes

B. No

Answer: B

Question: 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You use `dplyrXdf`, and you discover that after you exit the session, the output files that were created were deleted.

You need to prevent the files from being deleted.

Solution: You use `dplyrXdf` with the `outFile` parameter and specify a path other than the working directory for `dplyrXdf`.

Does this meet the goal?

A. Yes

B. No

Answer: A
